TITANIUM TUNGSTEN

Tomorrow's technology - Today's Dart!
A breakthrough in Tungsten technology
Created by Unicorn design specialists using state-of-the-art scientific approach
Ionised titanium fed into a plasma of ionised argon and nitrogen creates titanium nitride which 'grows' on the 90% tungsten alloy substrate
This costly technique coats the tungsten alloy surface with an ultra hard, wear and corrosion resistant compound at the same time beneficially improving texture and 'feel'

See the difference...
Gold distinction - a new look for darts
MX black SilkStik® patent shaft discreetly gold banded
Golden "Q™" Super-wave metallic flights
Laser engraved Unicorn hallmark of quality
Deluxe Designer Case

Feel the difference...
New texture, optimum 'feel', grip
Without slip but the smoothest release yet
Surface does not absorb natural oil in fingers - 'feel' retained throughout its long life
